FR pipe trade brochure

The old FR-Pipe PDF lands here. These cards are PE100 pressure pipe from the high-pressure hub. None of them is a fire-rated or FR listing.

PE100 pipe photo. Not an FR listing.

Same family photo for every published size.

Confirm the datasheet. Do not infer a fire listing.

Not an FR catalogue

The high-pressure hub says fire-rated or FR specialty pipe is quoted from the spec and the manufacturer datasheet. There is no FR product title in the file.

Coils we publish

75mm PE100 PN6 SDR26, 50m coil, SKU 11001-075-6. 110mm PE100 PN8 SDR21, 50m coil, SKU 11001-110-08.

Sticks we publish

160, 200 and 250mm PE100 PN6 SDR26, 6m. 355mm PE100 PN8 SDR21, 6m. Weight chart is a method, not a design table.

Price-free. A black PE100 page is not a fire listing.

NOT FR

75mm PE100 PN6 coil**SKU 11001-075-6**

OD	75mm
PN / SDR	PN6 / SDR26
Length	50m coil
Material	PE100

Still not the FR-Pipe file

- 355mm buying notes also sit on the 355mm pipe guide.
- Do not mix coil and stick wall classes without the engineer.
- Quote from the branch. No prices in this brochure.

FR pipe trade brochure

What to send

- The clause that says FR or a specialist compound
- Manufacturer designation if the drawing names one
- OD, PN or SDR, and stick or coil if the line is PE100
- Joint method
- Quantity and site
