SGI fittings trade brochure

Both old SGI fittings PDFs land here. Three cast-iron pages are live. The other 79 FSGI rows stay off the index because their stored spec block is a PE100 pipe template.

Repair connector family

Flange adaptor family

Equal tee family. No size page yet.

Published

FSGI-SC-110 repair connector. FSGI-FA-110-UNI and FSGI-FA-160-UNI flange adaptors. PN16 is the title class only. UNI is not defined.

Catalogue only

82 CI rows. Patterns: reducing bush, end cap, unequal tee, socketed reducer, hydrant tee, scour tee, equal tee, plus the other adaptor and connector sizes.

Specs we will not copy

Unpublished rows still say SDR11, PE100, and SANS/ISO 4427. That contradicts a cast-iron title, so it is not repeated here.

Price-free. Family photos are shared across sizes.

FAMILY PHOTO

110mm CI repair connector
SKU FSGI-SC-110

Size	110mm
Pattern	Straight repair
PN on title	PN16
Not	The flange adaptor

SAME PHOTO

160mm CI flange adaptor
SKU FSGI-FA-160-UNI

Size	160mm
Pattern	Flange adaptor
PN on title	PN16
Not	The 110mm adaptor

[Open product page](#)**PN in the title is not a test certificate**

- No drilling, coating, or 25 bar claim on these pages.
- Reducing bush and end cap titles say PN25. Adaptor and tee titles say PN16.
- 79 other FSGI sizes stay noindex.

SGI fittings trade brochure

What to send

- Nominal size, or both sizes on a reducer
- Pattern from the title list
- PN on the drawing
- Drilling and coating if stated
- Quantity and whether the mating pipe is PVC or PE
