Water meters trade brochure

Nine catalogue meters, 15mm to 32mm. Polymer and brass volumetric Class C, and brass multi-jet Class B.
Quote from the branch.

Polymer volumetric

Brass volumetric

Brass multi-jet

Polymer volumetric

LXHP15 and LXHP20. Glass-reinforced, UV-stabilised polymer. Family literature: SANS 1529-1:2019 Class C (SA 1508), accuracy not affected by angle, 2 °C to 40 °C, 1600 kPa working pressure. LXHP20 adds the bowed-strainer note.

Brass volumetric

LXHB15, LXHB20, and LXHB25. DZR brass piston meters. Same Class C language and angle note. The bowed strainer is a 20mm note. The spring-loaded non-return is written for 20mm and 25mm.

Brass multi-jet

LXSG/FX15, FX20, FX25, and FX32. Horizontal install. Family literature: SANS 1529-1:2019 Class B (SA 1566), dry dial to 0.0002 m³, 1600 kPa, cold ≤ 50 °C, hot ≤ 90 °C. Titles name a reed switch.

Photos are the catalogue images already used on the product pages. One photo covers each family, so a 15mm card and a 32mm card can share a picture. Confirm the utility list, the class, and whether a pulse module is fitted before you lock a SKU. Working-pressure and temperature figures are family-literature notes, not a new datasheet.

FAMILY PHOTO

15mm polymer volumetric
LXHP15

Pattern	Volumetric piston
Body	UV-stabilised polymer
Class named	SANS 1529 Class C
Install	Angle note on family list
Pulse	Pulse prepared

FAMILY PHOTO

15mm brass volumetric
LXHB15

Pattern	Volumetric piston
Body	DZR brass
Class named	SANS 1529 Class C
Install	Angle note on family list
Pulse	Pulse prepared

[Open product page](#)

FAMILY PHOTO

15mm brass multi-jet
LXSG/FX15

Pattern	Multi-jet
Body	DZR brass
Class named	SANS 1529 Class B
Install	Horizontal only
Pulse	Title: reed switch

FAMILY PHOTO

20mm polymer volumetric
LXHP20

Pattern	Volumetric piston
Body	UV-stabilised polymer
Class named	SANS 1529 Class C
Install	Bowed strainer on this size
Pulse	Pulse prepared

[Open product page](#)

FAMILY PHOTO

20mm brass volumetric
LXHB20

Pattern	Volumetric piston
Body	DZR brass
Class named	SANS 1529 Class C
Install	Bowed strainer on this size
Pulse	Pulse prepared

FAMILY PHOTO

25mm brass volumetric
LXHB25

Pattern	Volumetric piston
Body	DZR brass
Class named	SANS 1529 Class C
Install	Spring NRV note, 20 and 25
Pulse	Pulse prepared

[Open product page](#)

FAMILY PHOTO

25mm brass multi-jet
LXSG/FX25

Pattern	Multi-jet
Body	DZR brass
Class named	SANS 1529 Class B
Install	Horizontal only
Pulse	Title: reed switch

FAMILY PHOTO

32mm brass multi-jet
LXSG/FX32

Pattern	Multi-jet
Body	DZR brass
Class named	SANS 1529 Class B
Install	Horizontal only
Pulse	Title: reed switch

[Open product page](#)**Confirm before you order**

Class B and Class C on these cards are the words already on the product pages (family literature cites SANS 1529-1:2019, SA 1566 for multi-jet and SA 1508 for volumetric). They are not a certificate. A reed-switch title does not prove the reed is in the box. Pulse prepared means a module can be fitted. Say which you need. There is no 25mm polymer SKU and no 32mm volumetric SKU on this site.

Contact the branch

Send the SKU, the pattern the tender names, and whether the pit is new or a retrofit. The branch confirms availability in writing. This brochure does not replace that quote.

Water meters hub

Contact page

What to send

- Nominal size and domestic or bulk duty
- Multi-jet or volumetric, if the schedule names one
- Class B or Class C from the tender
- Reed, pulse, or logger, and whether the module must be fitted
- Straight length, and new pit or retrofit
- Thread or flange mates

Not in this catalogue

- Bulk or Woltman-style meters. The hub names that pattern as something drawings ask for. It is not a SKU.
- Meter couplings and meter boxes. No catalogue record, so no page and no card.
- A 25mm polymer body and a 32mm volumetric body. The sizing guide already says they are not listed.
- Live prices, stock counts, utility approval, or a promise that the reed ships fitted.
